DODO

The dodo was a flightless bird that was about the size of a turkey. It lived only on the island of Mauritius in the Indian Ocean, where the tropical climate ensured it had plenty of food all year round.

DODOS LAID ONLY ONE EGG AT A TIME INSIDE THE NEST.

THEY ATE ANYTHING AND EVERYTHING!

SCIENTIFIC NAME:

Raphus cucullatus

DIET: omnivore

LENGTH: 29.5 inches (75 cm)

DISAPPEARED: 300 years ago

CAUSES: hunting and competition from other species introduced by humans

IT LIVED ONLY ON THE ISLAND OF MAURITIUS IN THE INDIAN OCEAN.

It was a chubby animal that probably had a big appetite. In fact, it gathered any kind of food it could find, including seeds, bulbs and fallen fruit, and even mollusks that it found on the beach and crabs that it had to chase to catch.

FEMALES BUILT THEIR NESTS ON THE GROUND AND HAD NO NEED TO PROTECT THEM SINCE THERE WERE NO NATURAL PREDATORS IN THEIR HABITAT.

HELP! LET'S GET OUT OF HERE!

HÁ MUITO, MUITO TEMPO, ELEFANTES DO TAMANHO DE OVELHAS, TATUS GIGANTES E TIGRES COM DENTES ENORMES ANDARAM PELA TERRA. SÃO ANIMAIS TÃO ESTRANHOS QUE PARECEM TIRADOS DE UM FILME, MAS EXISTIRAM MESMO! AGORA PODES CONHECÊ-LOS E APRENDER SOBRE AS SUAS VIDAS, O QUE LHESS ACONTECEU E COMO PODES SALVAR E PROTEGER OS ANIMAIS QUE ESTÃO ATUALMENTE EM PERIGO DE EXTINÇÃO.

VEM DESCOBRIR OS MAIS INCRÍVEIS ANIMAIS EXTINTOS!
